Perth IT&T Salary Index

Market Update: August 2010

The Perth market is sustaining the major lift in IT&T jobs available, first captured in our April 2010 Salary Index.

Increased demand is being experienced from both the resources sector (which has an estimated \$170bn of new projects scheduled, each of which will involve significant IT&T expertise) and from the broader WA industry.

Despite demand for talent continuing to grow, IT&T salaries in Perth have remained relatively steady over the past three months.

National IT&T market update

We are currently observing strong demand for a range of IT&T skills, as businesses across Australia, along with the major banks and WA's mining sector undertake transformational projects designed to help them gain ground in the recovering global marketplace.

The recent significant growth in IT&T jobs available – such as the 200% rise in Victoria and 30% in both New South Wales and Queensland – have been sustained in most states since April 2010.

As a consequence of the strong growth in the majority of states, the Australian IT&T skills pool is becoming stretched.

Many IT&T professionals are weighing up several prospective roles concurrently and candidates are being secured up by the organisations who can move most quickly from shortlist to making firm job offers.

Perth IT&T Salary Index

About The Peoplebank IT&T Salary Index

The Peoplebank IT&T Salary Index is based upon IT&T job offers and employment activity in Perth during the past three months.

Permanent Salaries

All permanent salaries listed are **base salaries only** and do not include bonuses, superannuation, commissions or other benefits.

When formulating salary ranges, as a general rule...

Junior: Less than 3 years of experience in the role

Intermediate: 3 to 5 years in the role

Senior: More than 5 years in the role

Contract Rates

Please note that all rates listed are the '**Rate to the Contractor**' only and do not include management fees, superannuation, bonus, commissions or any other benefits or fees.

When formulating Contractor ranges, as a general rule...

From: the average minimum hourly rate achieved

To: the average maximum hourly rate achieved

Contract rates are generally determined by the skills and experience of the individual contractor combined with the market demand for those particular skills at the time the contract was offered.

The figures provided are based on aggregate averages, some rates may fall slightly below the minimum or slightly over the maximum, however these were generally considered as exceptions.

Salary and Rate Movements

Salaries and rates shown in **green** indicate an increase over the past three months whilst those shown in **red** indicate a decrease.
