Peoplebank Insights - National Overview

In the past six months, we have experienced new challenges and new opportunities across Australia. As we confront staff shortages, navigate shifting government agendas, and meet increased demand for diverse hiring strategies, adaptability and innovation remain priorities. We've observed a slight easing in contract rates, yet with interest rates stabilising, we step into 2024 with renewed confidence. Permanent positions have shown more stability, attributed to the commitment of a steady and reliable salary, that has led to heightened interest from candidates in our permanent roles.

Leadership Team Industry Insights

"A new report from the tech sector launched at the Digital Employment Forum in Canberra in August stated that by 2030 Australia will need to employ 653,000 tech workers. Currently, the percentage of people working in IT is expected to rise from around the 6.7% that it was in 2022 to 8.5% by 2027 and rise to 10% by 2030.

This aligns with the current trends observed in the NSW market, where the demand for jobs continues to surge, while the pool of highly-skilled talent is progressively dwindling. In light of these challenges, we have proactively addressed the situation by tapping into overseas talent pools, initiating our Leaders IT mentorship program to enhance the skills of our tech personnel, and deploying strategic sourcing methods to overcome barriers to employment for promising candidates."

DARREN FARMEARY - COMMERCIAL MANAGER NSW

NSW

After a soft finish to 2023, the market has rebounded strongly here in Victoria, clients are back from annual leave, hoping to secure great talent before their competitors.

The staff shortages continue to provide challenges across all IT & Digital verticals and Peoplebank is expecting this to continue to drive competition throughout 2024 as clients lean into new and innovative ways to develop their own talent with the support of programs like our awarding-winning Capacity Uplift Solutions Program.

DOMINIC GLASS - GENERAL MANAGER, NATIONAL KEY ACCOUNTS

peoplebank

Leadership Team Industry Insights

"In 2023, South East Queensland IT experienced a steady decline in vacancies, and low candidate activity until a late surge in November and December, resulting in a 30% increase in applicants searching for new roles. This surge aligned with a dampening of IT wage growth due to the heightened competition."

"Despite overall optimism among customers regarding headcount growth in 2024, any changes in Government post our Local and State elections will likely lead to program reviews or cuts in the Public Sector, and an increase in the availability of IT contractors in the job market. Cyber Security remains crucial for local Tech leaders, and growing pressure from business stakeholders on AI adoption and data utilisation is expected to sustain demand in these high-priority areas."

NATHAN COLETZ - GENERAL MANAGER QLD

"Between July and November, the ACT saw supply and demand equalise, with good competition for all roles. The Federal Government has since completed a number of permanent IT recruitment campaigns, and with the end-of-year renewals finalised, the volume of quality candidates on the market has now reduced. This has created slightly limited options for some job types (e.g. Cyber, Cloud), for projects looking to increase headcount for 2024. All in all the market should remain steady until March-April."

NICOLE SHEPHERD - GENERAL MANAGER ACT

peoplebank

Leadership Team Industry Insights

"WA has seen a period of consolidation in rates and salaries since the last salary index was compiled. The most notable areas where drops have been seen are in the Project Management and Developer areas of the market as projects have come to completion and resources in those spaces have hit the market increasing competition for the available opportunities on offer from clients."

2024 looks like it's shaping up to be a period of further contraction in rates and salaries as competition for opportunities heats up in WA and clients rebalance their spending against their budgets."

HAYDN BELL - GENERAL MANAGER WA

"The South Australian market saw a very positive uplift for both permanent and contract roles, with the Peoplebank Adelaide office having an exceptionally busy October to December quarter."

The most in-demand needs we had from our clients during this time were for Business Analysts, Project Managers, Software Developers/Engineers, Service Desk, Architects, and Systems Analysts."

In terms of industry, we saw increased needs from the Federal and State Governments, manufacturing, defence, construction, and the not-for-profit sectors. Both clients and candidates seem very optimistic and 2024 is shaping up to be a busy year."

CRAIG SALMON - GENERAL MANAGER SA

peoplebank

About the Salary Guide

The Peoplebank salary tables are based upon IT & Digital job offers and employment activity in each location Peoplebank operates in during the past six months.

Permanent Salaries

All permanent salaries listed are **base salaries** only and do not include bonuses, superannuation, commissions or other benefits.

When formulating salary ranges, as a general rule:

Low: The lowest salary expectation. Usually candidates will have less than 3 years of experience in the role.

Median: The middle salary expectation. This will tend to be the predominant expectation with most candidates having 3 to 5 years experience in the role.

High: The highest salary expectation. The best candidates available with most candidates having more than 5 years experience in the role.

Specialist Tables

Some of the roles listed within our specialist tables are emerging and Peoplebank have not yet experienced demand across all states for them yet. Where values have been set to zero (-) it indicates we do not have sufficient data for that role / location to provide a reliable estimate.

Contract Rates

Please note that all rates listed are the '**Rate to the Contractor**' only and do not include management fees, superannuation, bonus, commissions or any other benefits or fees.

When formulating Contractor ranges, as a general rule:

Low: the minimum daily rate achieved for that position
to

High: the maximum daily rate achieved for that position.
